Elitmind Has Earned the Analytics on Microsoft Azure Advanced Specialization

[Warsaw] – **[07/05/2021]** – Elitmind today announced it has earned the Analytics on Microsoft Azure advanced specialization, a validation of a partner's capability in planning and delivering tailored analytics solutions, following Microsoft and industry best practices.

Only partners that meet stringent criteria around customer success and staff skilling, as well as pass a third-party audit of their analytics planning and deployment practices, are able to earn the Analytics on Microsoft Azure advanced specialization.

As more businesses recognize the value of effective data and analytics strategies but struggle to implement them, partners with proven experience delivering customized, made-to-measure Microsoft analytics solutions using Azure Synapse Analytics, Azure Data Lake, Azure Data Factory, and Azure Databricks are well-positioned to capture this market opportunity.

These partners can help customers better integrate endlessly scalable analytics platforms into their businesses to quickly capture insights from all their data across data warehouses and big data analytics systems.

Elitmind Board Members and Founders – Radosław Kępa and Robert Woźniak say: "This advanced specialization gives us mostly confirmation of our approach to delivering comprehensive analytics solutions and of the level of knowledge and experience that is necessary to handle even bigger and more crucial workloads. An audit is also a great opportunity to verify a good understanding of the Cloud Adoption Framework and the Well-Architected framework. Everything we achieved is thanks to our experienced and dedicated team"

Rodney Clark, Corporate Vice President, Global Partner Solutions, Channel Sales and Channel Chief at Microsoft added, "The Analytics on Microsoft Azure advanced specialization highlights the partners who can be viewed as most capable when it

comes to building transformative and secure analytics solutions on Azure. Elitmind clearly demonstrated that they have both the skills and the experience to help our customers harness the power of insight and transform their businesses in a scalable, secure, and cost-effective way."
